Elevate Your Game, Elevate Your Life!

New energy golf cart,
360° full service system,
24 hours to answer questions.

The latest model of golf cart in 2025

Say goodbye to the past Upgrade the performance

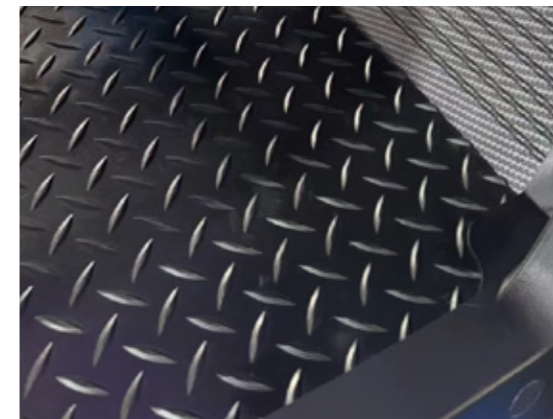

Electronic power steering

Electronic Power Steering (EPS) gives feedback to the driver about the road conditions. The vehicle can be steered very precisely even in critical driving situations and has better driving dynamics and more driving comfort. Another advantage of EPS is the increased driving safety.

Aluminum chassia

Aluminum is a lighter material, so golf carts with aluminum frames are easier to operate and transport. Additionally, since aluminum is a corrosion-resistant metal, golf carts with aluminum frames are less likely to rust.

Adjust steering wheel

All versions including 2-seater, 2+2-seater, 4-seater, 4+2-seater and 6-seater, the style of the steering wheel can be adjusted according to the requirements.

Why Buy a golf cart?

Golf carts are versatile vehicles that can be used for various tasks, from transporting people and equipment on the fairway to moving items in a warehouse or taking a quick trip to your local pool. If you're looking for a comfortable, reliable, and affordable vehicle to help with daily tasks or enhance your leisure time, a golf cart is an excellent choice!

51.2V Main Parameters of Lithium Battery Pack

(Standard Equipment)

Nominal Voltage 51.2V	Pack Size (L*W*H) 490*345*246.5mm
Nominal Capacity 105.0Ah	Net Weight 49kg
Standard Charge Current 25.0A	Reverse Charging Current 100A
Standard Discharge Current 50.0A	Voltage at end of Charge 58.4V
Max Continuous Charging Current 50.0A	Voltage at end of Discharge 40.0V
Max Continuous Discharge Current 100.0A	
Max Discharge Current 300.0A (10s, ≥30%SOC, 25±2°C)	Short Circuit Protection Current 880.0A (Device Protection)
Cycle Life 4000cycles, 80%SOH, 25°C 2000cycles, 80%SOH, 45°C	

73.6V Main Parameters of Lithium Battery Pack

(Optional Equipment)

Nominal Voltage 73.6V	Pack Size (L*W*H) 690*345*246.5mm
Nominal Capacity 105.0Ah	Net Weight 68kg
Standard Charge Current 25.0A	Reverse Charging Current 100A
Standard Discharge Current 75.0A	Voltage at end of Charge 84V
Max Continuous Charging Current 50.0A	Voltage at end of Discharge 57.5V
Max Continuous Discharge Current 120.0A	
Max Discharge Current 300.0A (30s, ≥30%SOC, 25±2°C)	Short Circuit Protection Current 880.0A (Device Protection)
Cycle Life 4000cycles, 80%SOH, 25°C 2000cycles, 80%SOH, 45°C	

Controller

Three styles to choose from, pick the one you like.

·FJ Controller 350A (AC)
(Standard Equipment)

·Curtis controller 400A
(Optional Equipment)

·Navitas controller 600A
(Optional Equipment)

Running Boards

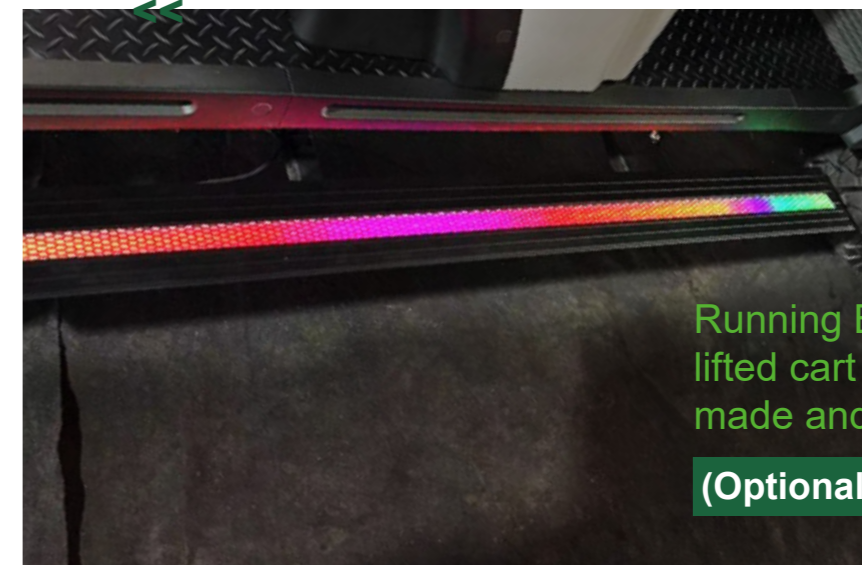

Running Boards for lifted cart

Standard Equipment

Running Boards for lifted cart with logo and lights

(Optional Equipment)

Running Boards for lifted cart aluminum made and lights

(Optional Equipment)

LED Light Set

(Optional Equipment)

The entire LED lighting system can flash in accordance with the rhythm of the music.

necessary for family travel.

Safe and reliable hardware facilities

01. Electromagnetic parking

PDifferent from the traditional handbrake, we use advanced electromagnetic parking system.

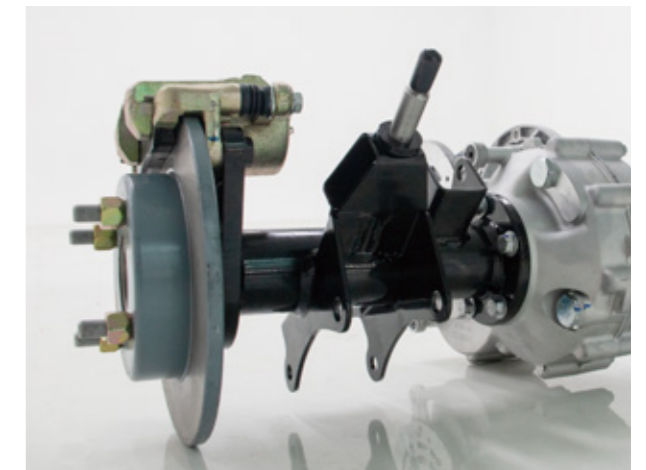

Electronic parking can automatically apply the parking brake after the engine is turned off. Parking is convenient and reliable to prevent accidental release. The use of more advanced electronic control technology to replace the traditional mechanical handbrake, to avoid parking forget the handbrake, start forget to release the handbrake unsafe accidents.

02. Four wheel disc brake

Compared with the traditional front disc and rear drum, we choose a safer four-wheel disc brake.

The brake disc and brake calipers of the four-wheel disc brake can provide better heat dissipation and braking effect, because the heat dissipation effect is good, so the brake system of the four-wheel disc brake has a longer service life. At the same time, the four-wheel disc brake system can provide more stable braking force, thereby improving the handling of the vehicle.

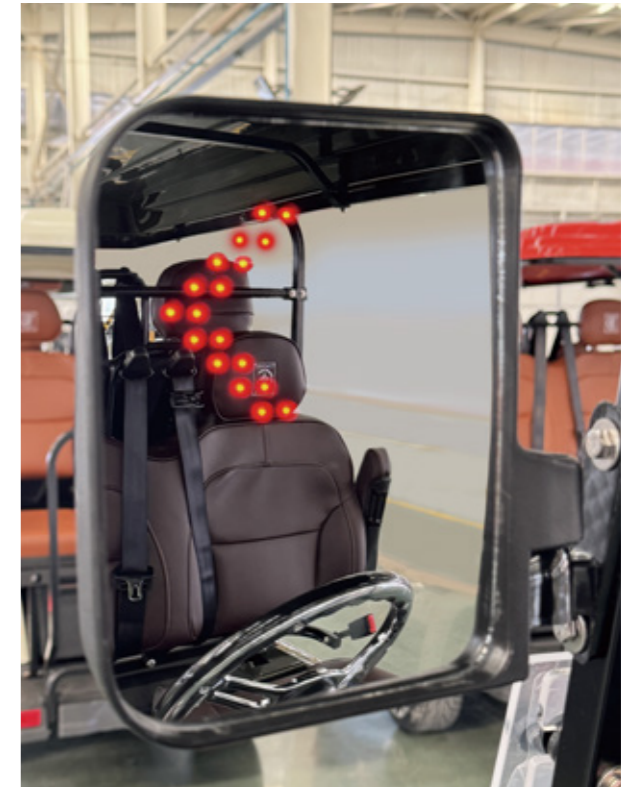

More storage space

Greater and more storage space, making it convenient to carry more items when traveling.

Turn signal and rearview mirror

The system that simultaneously activates the turn signals on both the front and rear of the rearview mirror and at the rear of the golf cart.

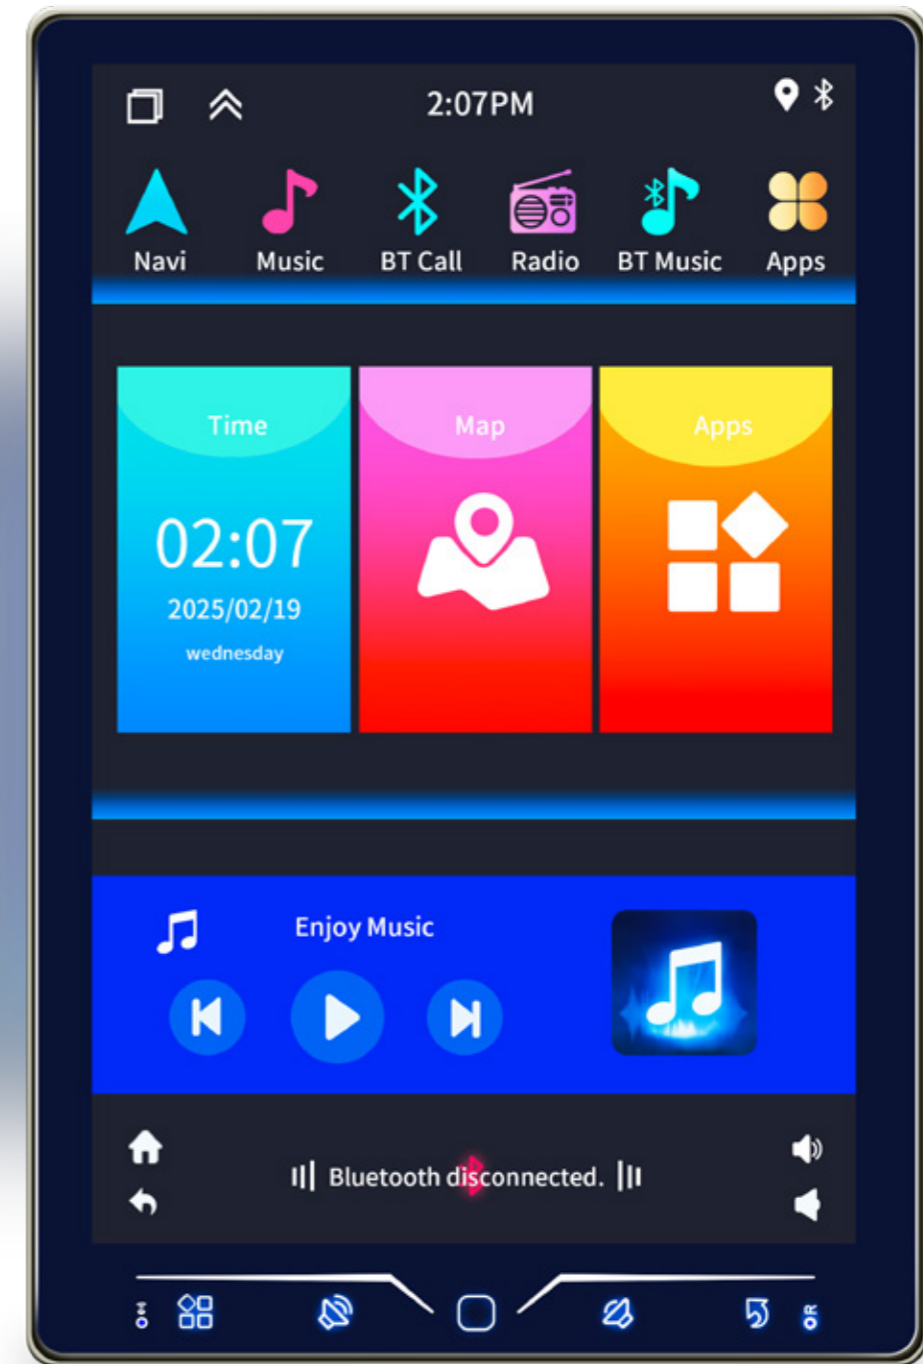

Intelligent central control

HD large screen, can be linked to the mobile phone, driving can make calls, can also play music, make your life more exciting.

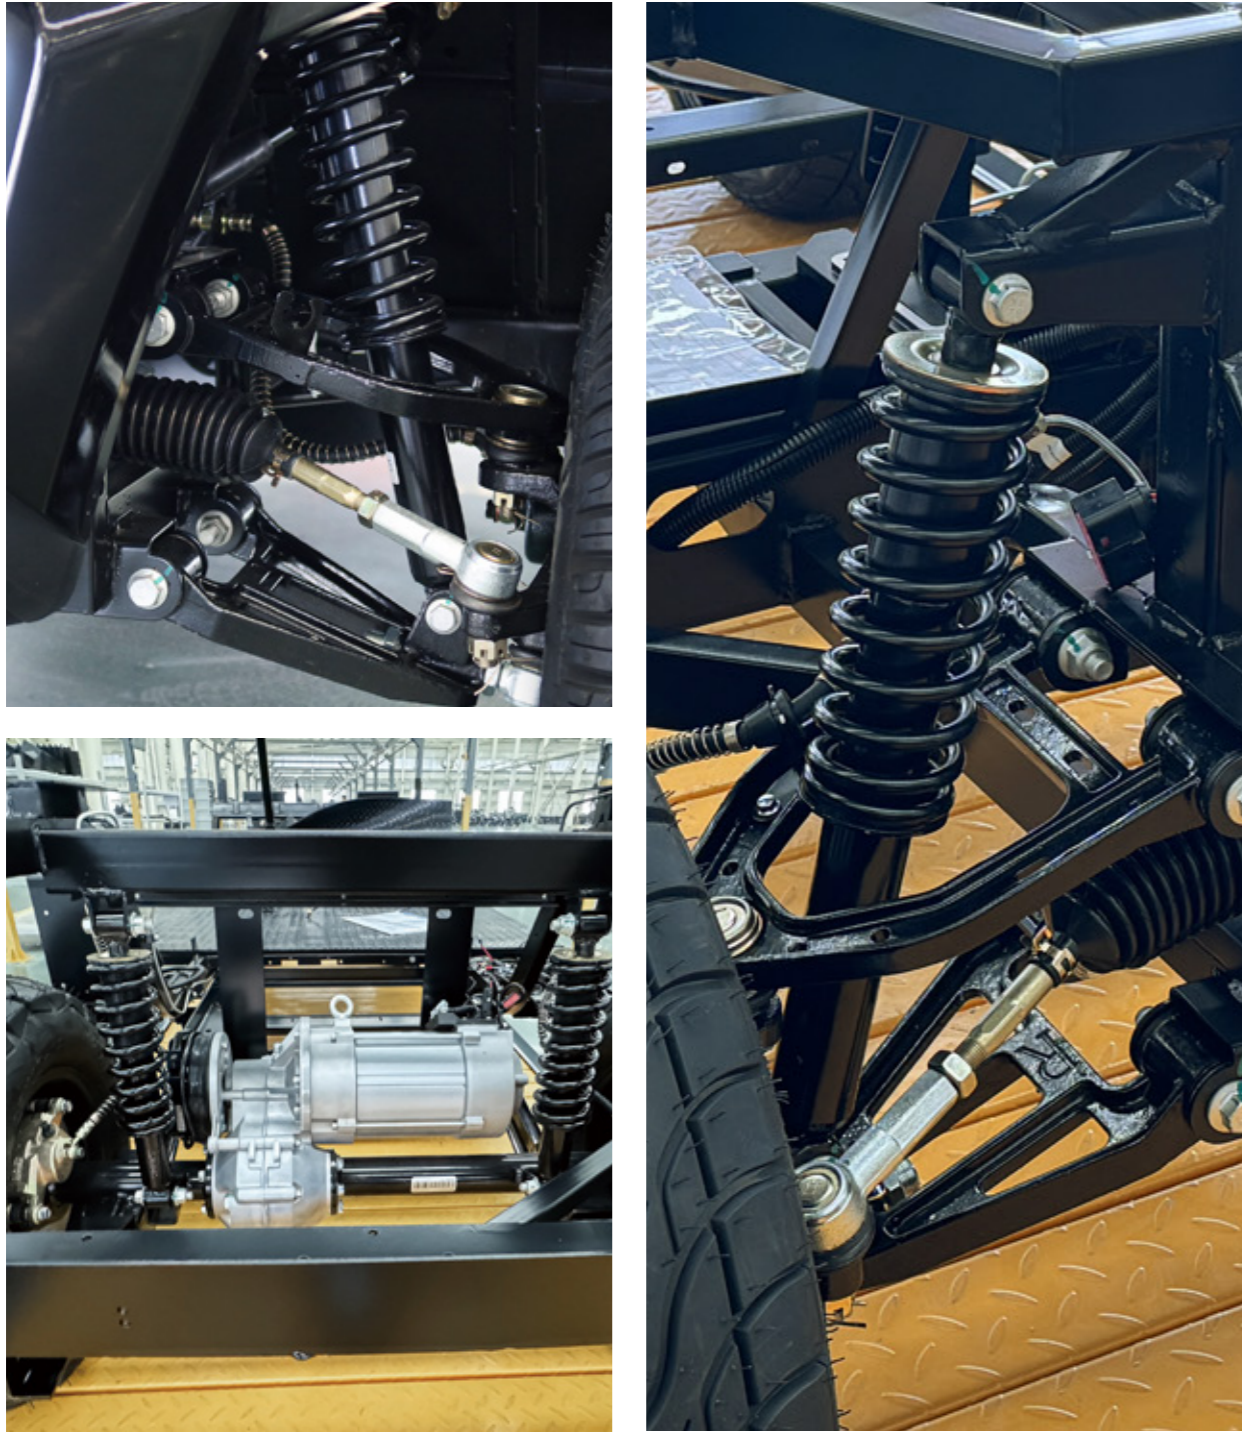

Two system rotating screen with android app downloads

90° rotating player, LCD touch screen
The screen shows Bluetooth, radio and mobile phone connections.

Comfort

Good driving experience is essential for a golf cart.

Coilover Suspension With Extra Springs For A Smooth Ride

Independent suspension

different from the traditional golf cart, this design buffer and shock absorption ability is strong, more comfortable to ride.

Intimate Detail Design

Even the smallest details are taken into account for you.
